### GOVERNMENT OF MAHARASHTRA BUREAU OF ECONOMICS AND STATISTICS

### STATISTICAL ABSTRACT

OF

Maharashtra State

FOR THE YEAR

1966-67

NAGPUR. GOVERNMENT PRESS, 1970

### **PREFACE**

This is the fourth issue of the Statistical Abstract of Maharashtra State. The scope of the Abstract is generally the same as that of the earlier issues of the Statistical Abstract, except that certain tables on judicial statistics, prisons, vital statistics and consumer price index numbers of agricultural workers and non-manual employees have been added in the present issue. Attempt has been made, to the extent possible, to present the districtwise statistics up to the year 1966-67. In certain cases, however, the relevant statistical information for the year 1966-67 is not yet available from the original sources. In such cases, the latest available information is presented.

For compiling the information for the Statistical Abstract various Departments and Offices of State Government, Government of India and local organisations have extended necessary assistance by supplying requisite material to us and we are thankful to all these organisations.

It is hoped that this publication giving districtwise statistics on most of the socio-economic characteristics of the State will serve as a detailed reference book for those who are interested in socioeconomic and regional studies of the State.

S. M. VIDWANS,

Bureau of Economics and Statistics,
Bombay.

31st March 1969.

### STATISTICAL ABSTRACT OF MAHARASHTRA STATE 1966-67

Notes. -(1) These index numbers of productivity have been worked out by dividing the index number of production of each commodity by the index number of area.

- (2) Index numbers of productivity for kharif jowar, rabi jowar, kodra, mesta and potatoes have not been worked out for the years 1951-52 to 1955-56 as the estimates of both production and area of these commodities are not available.
  - (3) Index numbers of productivity for the years up to 1964-65 are based on fully revised estimates while those for 1965-66 and 1966-67 are based on partially revised estimates.

Note.—The classification is first shown according to division. Each division is further sub-divided into 'Groups' (two digited).

Each Group is further sub-divided into 'Families' (three digited) of occupations. In the above table figures are shown according to divisions and also according to groups. A further break-up according to families in respect of a few important groups is also shown above n. e. c. means not elsewhere classified.

# APPENDIX

# EXPLANATORY NOTE ON SOURCES AND LIMITATIONS OF STATISTICS PRESENTED IN THE STATISTICAL ABSTRACT

#### 1. Purpose and Scope:

- 1.1. This is the fourth issue of the Statistical Abstract of Maharashtra State which is being published since its formation in 1960. As stated in the first issue, the purpose of publishing this Abstract is to present background statistical material on as many socio-economic characteristics of the State as is possible so that the Abstract may prove useful not only as a reference book but also for research, planning or further socio-economic studies about the State. The information is, to the extent feasible, presented districtwise for inter district comparison. Some social and economic statistics are presented over a series of years to bring out changes in these fields.
- 1.2. The present issue relates to the year 1966-67 and the detailed data are published for the year 1966-67 wherever possible. Also, yearly series up to the year 1966-67 are presented. Wherever data for 1966-67 were not available, the data for the latest available year are given. The statistical data presented in these Abstracts are initially compiled by various departments of the State Government. Government of India, local bodies, etc. These departments usually prepare and release provisional figures for recent years. These provisional figures are in the process of finalisation, and ultimately when they are finalised, they are slightly different from the provisional figures released earlier. For this reason, the data published in the Bureau's other publications vix., 'Handbook of Basic Statistics of Maharashtra State'. 'Maharashtra-An Economic Review' or the earlier issue of the Statistical Abstract may be found to be slightly different from those published in this Abstract.

#### 2. Maharashtra State at a glance:

- 2.1. This table is divided in two parts. In the first part, some general particulars about the State are given. In the second part, the State indicators under various heads such as population, agriculture, etc., are presented with the corresponding figures relating to the country. Against each item, the period to which the figures concerning Maharashtra and India, respectively relate is mentioned. In many cases, this period is not identical. In such cases, the data for latest available year for India is shown and comparison of Maharashtra with India is made with reference to this year or period. The table also gives percentage share of Maharashtra in the figure relating to the country. For instance, against item No. 1.1 (a), the rural population of Maharashtra is shown to be 7.9 per cent of the total rural population of the country. In addition, important comparable indicators are also shown both in respect of Maharashtra as well as India. For instance, against item No. 1.1 (b), the percentage of rural population to the total population in the State is shown as 71.8 along with the corresponding percentage of 82.0 for all India.
- 2.2. Number of talukas shown under 'General Information' does not include three talukas in Greater Bombay. In 1966-67, there were 234 talukas in Maharashtra. The information regarding factories and employment shown against item 5.1 is inclusive of defence factories. Road length per 100 sq. km. of area shown against item 9.2 is quoted from 'Basic Road Statistics of India. 1967' published by the Ministry of Transport and Shipping. The estimates of State Income and National Income given against item 10 are according to conventional series. For India, estimate of National Income and not Net National Domestic Product is shown. During 1964-65, Net National Domestic Product was estimated at Rs. 20,500 crores.

#### 3. Summary Tables:

3-1. Summary tables on the following topics have been presented here: (1) Agriculture—(i) Land utilisation, (ii) Area irrigated by sources, (iii) Area irrigated by crops, (iv) Area and outturn of principal food and non-food crops. (2) Livestock, (3) Community Development Programme, (4) Co-operation, (5) Industries (factory statistics), (6) Electricity, (7) Joint-Stock Companies, (8) Education and (9) State Income. In these tables, data over a series of years are presented. In all the tables under agriculture, data are shown for the years from 1951-52 to 1966-67. Under Livestock, the data pertaining to the four livestock censuses i.e., 1951, 1956, 1961, and 1966 are shown. The Community Development Programme commenced in 1952-53. This table gives the position of the State as regards its coverage under the Programme at the end of each year since 1952-53. As regards Co-operation, the data for the years since 1958-59 are presented. The figures for earlier years according to new form are not available for seme of items and hence are not shown here. Under Industries, information regarding number of working factories and their average daily employment is shown for the years 1950, 1955 and all the years since then. As regards Electricity, the data relate to calendar years up to 1956. Since 1957-58 the data relate to financial years. Under Joint Stock Companies at work, data for four years only as released by the Government of India could be furnished. Under Education, the data is presented for all the years since 1950-51. Under 'State Income' the data are presented for all the available years since 1955-56. It must be remembered here that the figure pertaining to Maharashtra for the years prior to 1960 have been built up on the basis of old data, and by apportioning its relevant part to the present boundaries of Maharashtra. While doing so, in a few cases, only approximate estimates could be made. The concepts of certain terms and the limitations of the data appearing in Summary tables are described below under the rel

# 4. Area and Population (I):

4.1. Final figures of 1961 Population Census are presented in all the tables in this section. The table No. 1.1 gives districtwise figures of area, number of talukas, number of towns and villages, and rural and urban population. Number of talukas shown in table 1.1 does not include 3 talukas in Greater Bombay. The Number of talukas as in 1961 are shown. A 'village' is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have not been treated as separate villages. Forest villages make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Such forest villages are also treated as villages. Number of inhabited villages shown in column 6 of table 1.1 denotes number of inhabited revenue villages and inhabited forest villages. Out of 35,851 inhabited villages in the State, 35,831 are inhabited revenue villages and 442 inhabited forest villages. For the purpose of 1961 census, a town or an urban area was defined as a place which has (i) a municipality, a cantonment or civil lines or (ii) population of 5,000 or over and at least three-fourths or more of mile workers engaged in non-agricultural pursuits. The table No. 1.2 gives districtwise figures of 1951 and 1961 population and percentage increase in 1961 population over 1951. Table No. 1.4 gives similar break-up of towns or urban areas according to population ranges. The table No. 1.5 gives a complete list of town-groups and towns in each district and their sexwise population. The table No. 1.6 gives literacy percentages of the population in each district as in 1951 and in 1961. The 1951 figures had to be estimated in the case of a few districts. The table No. 1.7 gives districtwise details of population of scheduled castes and scheduled tribes as in 1961. The general population so as to facilitate comparison with earlier Census. The population census is a mass-scale operation to be completed in shortest possible

# 5. Climate (II):

- 5.1. The table No. 2.1 gives 'mean', 'mean maximum' and 'mean minimum' annual temperature in respect of 38 centres in the State. The figures are based on the monthly data supplied by the Government of India's regional meteorological centres at Colaba (Greater Bombay) and at Nagpur. The mean maximum and mean minimum are the averages of maximum and minimum temperatures observed daily during the year. The mean temperature is the average of the mean maximum and mean minimum temperature thus arrived at.
- 5.2. The table No. 2.2 gives monthly normal rainfall and number of rainy days in each month and in each district. The district figures are the simple averages of the normal rainfall at different raingauge stations in each district and the normal number of rainy days respectively. The table No. 2.3 gives monthwise figures of actual rainfall and number of rainy days for 1967 in respect of each raingauge station in the district. Annual figures for 1966 and 1965 and figures of average or normal rainfall are also given for each centre. These centres are generally the taluka or district head-quarters in the districts. The figures of normal rainfall are worked out on the basis of actual rainfall for the periods ranging from a minimum of five years to a maximum of eighty years. As regards rainy days, a day was treated as rainy day if during the twenty-four hours, the raingauge recorded a minimum of 2.5 mm. of rainfall.

#### 6. Agriculture (III):

- 6.1. The important statistics in the section are sub-divided into (i) Land utilisation, (ii) Irrigation and (iii) Area and Outturn of individual crops.
- 6.2. The table No. 31 gives districtwise figures of land utilisation under the standard heads of utilisation. Against each district, the break-up of the total geographical area according to different types of land used is shown. The changes in the progress of cadastral surveys. The area according to the total geographical area according to the village person in the progress of cadastral surveys. The area according to the figures of total area according to the Surveyor General and according to the village papers because the latter is calculated by totalling upvillage returns byte its former is calculated in blocks.\* Moreover, allowances made for areas covered by water, buildings, roads, etc., are different in two cases. Under Forests' are included all actually forested areas or lands classed or administered as forests under any legal enactment dealing with forests whether State-owned or private. If any portion of such land is not actually wooded but put to some agricultural uses, that portion is included under the appropriate heading of cultivated or uncultivated land. Land put to non-agricultural uses stands for all lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural. Barren and unculturable land covers all barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation unless at a high cest, classed as unculturable whether they are permanent pastures and meadows or not. Village common and grazing lands cover all grazing lands whether they are permanent pastures and meadows or not. Village common and grazing lands cover all grazing lands whether they are permanent pastures and meadows or not. Village common and grazing lands ever all grazing lands whether they are permanent pastures and meadows or not. Village common and grazing lands ever all grazing lands which are accounted to the contract of the past of the p

# 7. Community Development Programme (IV):

7.1. The entire rural area of the State is now covered by the Community Development Programme. The State is delimited into Community Development Blocks of specified size. This section contains only one table, viz., table No. 4.1 which gives districtwise figures of achievements under selected items under C. D. Programme during the years 1965-66 and 1966-67. The table shows achievements through other development activities also besides those under the Community Development Programme.

# 8. Animal Husbandry (V):

8.1. The table No. 5.1 gives the number of various types of livestock and poultry as enumerated in the State at the time of 1961 and 1966 Livestock Censuses. These are quinquennial censuses conducted throughout the country on the uniform basis of concepts and methods of enumeration. At these censuses, all the livestock is enumerated by house-to house enquiry. Particular care is taken to enumerate livestock in slaughter-houses, stray animals and animals in transit. The presentation of tables

<sup>\*</sup>The Survey of India calculate the area by planimetering from maps which represent the ground in horizontal plane with the help of areas of qua drilaterals of 15 minutes latitude and longitude already worked out by them.

5.2 and 5.3 is altered in this Abstract. The table No. 5.2 gives statistics regarding number of animals and poultry treated and number of animals castrated by veterinary staff of the Government, Zilla Parishads and Municipalities. The table No. 5.3 gives the number of different types of veterinary institutions of the Government, Zilla Parishads and Municipalities functioning in districts as on 31st March 1967. The table No. 5.4 gives information regarding number of different types of institutions owned by Government such as breeding farms, A. I. Centres, etc., functioning as on 31st March 1967.

#### 9. Forests (VI):

9.1. Two tables are included in this section. The table No. 6.1 gives details of area under different types of forests. Information regarding forests under the control of the States' Forest Department and those under the control of the States' Revenue Department is shown separately. The areas under forests are classified according to legal status into reserved forests, protected forests and unclassed forests. The legal status refers to the classification of forests under the Indian Forests Act, XVI of 1927. Reserved forests are those that are intended mainly for timber production and in which rights of grazing and cultivation are seldom allowed. In protected forests, the restrictions are not so rigid; right of grazing or cultivation is allowed but certain limitations and restrictions are imposed. The unclassed forest refers to the inaccessible forests or unoccupied waste. The forests which are taken by Government from local bodies or private individuals for management on lease basis are called 'leased forests'. There is no classification of ex-proprietary forests as such but in Nagpur Division, some private lands containing valuable forests are taken over by Government under section 29 of the Indian Forests Act and which are not yet classified as per tripartite classification are termed as ex-proprietary. The forest area shown in table No. 6.1 may not tally with the area under forest shown in table on land utilisation in Agriculture section. The two sets of figures differ due to the following reasons: (i) In the Indian Forest Statistics Returns, the whole area including non-wooded area under the control of Forest Department is taken as area under forests while in Agricultural Statistics, it is classified according to its actual utilization. (ii) The Forest Department returns are meant to serve a definite administrative purpose and indicate the ownership of the forest areas the actual utilisation of these areas is not so important from their point of view as it is in the land utilization statistics for Agricultu

#### 10. Fisheries (VII):

10.1. The table No. 7.1 gives information regarding quantity of fish brought for curing at curing yard, quantity of salt issued and the quantity of fish removed. Table No. 7.1 refers to the curing done by salting process in Government curing yards alone. The table No. 7.2 gives information regarding fishing boats, estimates of total fish production, activities of the co-operative sector in fisheries and some salient features of the activities of the State's Fishery Department. The table No. 7.3 gives further break-up of the marine fish production according to districts.

# 11. Co-operation (VIII):

11-1. Statisticul information is shown separately in respect of the following groups of co-operative institutions: (1) Agricultural and non-agricultural credit, apex and central institutions (Table No. 8-1), (ii) Agricultural credit societies including primary land mortgage banks and grain banks (Table No. 8-2), (iii) Non-agricultural credit societies (Table No. 8-3), (iv) Marketing societies (Table No. 8-4), (v) Societies in productive enterprises (Table No. 8-5) and (v) Other societies (Table No. 8-6). Table No. 9-1 covers Maharashtra State Co-operative Bank, Bombay State Co-operative Land Mortgage Bank, Maharashtra Housing Financial Society, District Central Co-operative Bank and District Industrial Co-operative Bank, (Sholapur). Owned capital shows paid-up capital. Other borrowing denotes the total borrowings (other than deposits) outstanding at the end of the period. Working capital includes paid-up capital, deposits and borrowing. Loans outstanding includes outstandings in respect of loans, cash credits and overdrafts and the amount of the outstanding bills purchased or discounted. Overdues refer to the amount of loans or instalments which was due for collection but which was not actually collected and for the repayment of which no extension has been granted by a competent authority. Table 8-2 relates to the activities of the agricultural credit societies (large size and small size), primary land development bank and grain banks (active and dormant). Value of goods purchased, sold and stock at the end of the year refer to the consumer goods handled by the primary agricultural credit societies. Table 8-3 relates to the operation of urban banks and urban credit societies, employees credit societies and others. Table No. 8-4 relates to the activities of the marketing societies and agricultural marketing societies, employees credit societies and object of which is the purchase and sale of operation. At the structure institution the main object of which is the purchase and sale of operation of a district or re

# 12. Rural Credit (IX):

12.1. The transactions of money lending in the State are regulated and controlled under the provisions of the Bombay Money Lenders Act, 1946. According to the Act, no money-lender shall carry on the business of money-lending except in the area for which he has been granted a licence and except in accordance with the terms and conditions of such licence. The table No. 9-1 gives districtwise figures of (i) number of applications received for grant of licences under the Bombay Money Lenders Act, 1946, (ii) number of licences granted, (iii) number of old licences renewed and (iv) number of money-lenders holding valid licences at the end of each year. The table No. 9-2 gives details of loans given to traders and non-traders. These loans are sub-divided into those not granted under section 22 of the Act and those exempted under section 22.

# 13. Banks (X):

13.1. The table No. 10.1 gives a complete list of towns and villages in each district having bank offices. The table No. 10.2 gives the distribution of number of places having hanking offices and total number of banks therein in 1966 according to different population ranges. The table No. 10.3 gives districtwise number of scheduled bank offices, co-operative bank offices and 'others' in 1965 and 1966 respectively. The source of this information relating to Bank is 'Statistical tables relating to Banks in India' published by the Reserve Bank of India. The information is extracted from Appendix I of this publication. In the case of scheduled banks, the information shown for any particular year refers to 31st March of next year. For other banks, it is as per the accounting period of the balance sheet available.

#### 14. Local Bodies XI:

14-1. Financial position regarding Village Panchayats, Municipal Councils, Municipal Corporations, Zilla Parishads and Bombay Pert Trust is shown in this section. Table No. 11-1 gives districtwise information of (i) number of Village Panchayats, (ii) their total coverage in terms of villages and population, (iii) their income and (fre) expenditure. The information is given for the year 1963-64. In addition, the information for earlier three years is also shown for divisions and for the State as a whole. Number of Village Panchayats includes number of independent Village Panchayats as well as group Village. Panchayats. The number of villages covered and the population covered by the Village Panchayats as well as grants from Zilla Parishads and Panchayats are as per usual village. Panchayats are exclusive of opening and closing balance respectively. Under income, information is separately shown under grants, taxes and other income. Grants include Government grants as well as grants from Zilla Parishads and Panchayats satistists for development activities. Government grants are mainly land revenue grant, equalization grant and local cess grant. The other taxes include other taxes and fees imposed by the Village Panchayats. Similarly, the other income of Village Panchayats is contributions, donations, gifts and fines for contraventions of rules. Statistics regarding composition of seats in each Municipality and each Municipal Corporation in 1963-64 is shown in table No. 11-2. The number of councillors shown against the municipal election held in the respective municipality. The nominated members under Col. 5 also include co-opted member. Table No. 11-3 gives the receipt position of each Municipality for the year 1963-64. The income has been shown seconding to Municipal rules and taxes and other sources. Government grants under other sources are mainly grants on account of dearness allowance, grants for roads, for water supply, for educational purposes, for medical purposes and on account of percentage in land reven

# 15. Industries and Mining (XII):

15·1. In this section, statistics regarding employment in industries, industrial and mineral production and statistics on such related items as absenteeism, industrial disputes are presented. The factory statistics shown in table No. 12·1 and 12·2 cover following types of factories registered under Factories Act, 1948:—(i) those employing ten or more workers working with the aid of power (Section 2 m (i)), (ii) those employing twenty or more workers and working without the aid of power (Section 2 m (ii)) and (iii) those registered under Section 85 of the Act, under which the State Government makes applicable the provisions of the Act even though the above conditions are not fulfilled. However, defence factories are excluded. These tables show the number of working factories and not all the registered factories. The table No. 12·1 gives the distribution of working factories according to the size of the factory in terms of uverage daily employment of workers. The table No. 12·2 gives number of working factories and average daily employment therein according to major groups of industries. It must be mentioned here that the number of workers shown in these two tables are the average number of workers working daily throughout the year and not the total number on the roll of the factories. The table No. 12·3 gives the figures of production of selected industries in the State during 1966 and 1967. The table No. 12·4 gives districtives figures of mineral production and its value. The table No. 12·5 gives the figures of mineral production and its value. The table No. 12·5 gives the figures of production and its value. The table No. 12·5 gives the figures of a such as a such, absence of a worker on account of strike, lock out or lay-off is not considered. They cover 'workers' as defined by the Factories Act, 1948 but exclude persons holding positions of supervision or management or employed in confidential position. Moreover, only regular workers (excluding casual and substitute workers) are considered. They account to b

#### 46. Electricity (XIII):

16.1. The table No. 13.1 gives figures of (i) installed capacity, (ii) output and (iii) consumption of electricity during 1951 and 1956 and during the financial years from 1960-61 onwards. The figures relate to only public utilities including Chola Power House, Bombay. The table No. 13.2 gives progress of electrification under Maharashtra State Electricity Board. The table does not include villages and towns which are electrified by the private agencies.

#### Transport and Communications (XIV):

17.1. In this section, statistical information relating to various modes of transport is given. The table No. [4-1] gives districtwise railway length. The statistics relating to railway length in the country are initially compiled by the Railway authorities. But these statistics are according to railway zones and the districtwise break-up is not available. The districtwise figures had to be specially compiled by referring to railway time tables and the railway map. Difficulty arose while measuring the distance between the stations one of which was in one district and the other in the other district. Also, it was rather difficult to measure correctly the distance between the station located in the State and the border of the State. The figures presented in this table are approximate. The table No. 14-2 and 14-3 give figures of road length as at the end of each year. The figures relate to extra municipal roads maintained by the State's Buildings and Communications Department and local bodies such as Zilla Parishads. Roads maintained by municipal authorities are excluded. The data regarding road length are provisional. The table No. 14-6 gives figures relating to different types of motor vehicles in operation as at the beginning of each calendar year. The regions shown are (i) Bombay region consisting of Greater Bombay district, (ii) Thana region consisting of rest of Bombay division, (iii) Poona region covering Poona division, (iv) Aurangabad region covering Aurangabad division and (v) Nagpur region covering Nagpur division. The table No. 14-6 gives important operational statistics relating to Maharashtra State Road Transport Corporation. The figures relate to financial years. Table No. 14-6 to 14-9 give some important statistics regarding traffic handled by Bombay Port and minor ports of the State. The figures shown against minor ports are mostly those of coastal traffic. In the case of Bombay Port, figures of overseas traffic and coastal traffic are shown separately in the table. The table No. 14-11 gives stati (receiver) licences in force at the end of 1967.

#### 18. Employment (XV):

The first seven tables included in the section give economic classification of the population in the State made at the time of 1961 Population Census. For this purpose, necessary particulars were recorded in respect of each individual person and the time of 1961 Population Census. For this purpose, necessary particulars were recorded in respect of each individual person and the entire population was first classified into (i) workers and (ii) non-workers. A person is classified as worker if (a) in the case of seasonal work he had some regular work of more than one hour per day throughout the greater part of working season and (b) in the case of regular employment in any trade, profession, service, etc., he was employed during any of the fifteen days preceding the day of the enumerator's visit to his household. Those who did not conform to the above concept (women doing household work, students, rent receivers, beggars and unemployed persons, etc.), were classified as non-workers. Here 'work' meant craiming work'. The workers were further classified into nine main categories of economic activity. The number in each category and the total number of non-workers are shown in table No. 15.1. Category I includes both owner cultivators and tenant cultivators. Category II covers all other persons working on land as labours on wages without holding any right upon the land. Workers in household industry are included under Category IV. Household industry is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to repairing or making of goods. Thus the Workers in household industry are included under Category IV. Household industry is defined as an industry condeucted at home in urban areas or within the village in ural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to repairing or making of goods. Thus the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas. Manufacturing (Category V) Includes all types of production, processing, services gory early the production, processing, services in the production, processing, services in the production, processing, services in the production, processing, services in the production, processing, etc., which may be classified as household industry. Category VI covers workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc. Under category VIII, workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending, banking, etc., are included. Category VIII includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraphs, telephones, wireless sign. Illing, information and broadcasting area iso included in this category. Workers engaged in (i) Public Utility Services like electricity, gas or water supply and sanitary services; (ii) Central, State, Quasi-Government or Municipal Employees in administrative departments or offices; (iii) Professional services; and (iv) Trade or labour associations recreation services, etc., are covered under category IX. The table. Nos. [5-2 and [5-3] give occupational classific

#### 19. Ed ucation (XVI):

19.1. Salient features of progress of education in various parts of the State are presented in this section. Table No. 16-1 gives the towns and villages with and without schooling facilities. Towns and villages with a school are those which have at least a primary school within them. Villages with schooling facilities include smaller villages (generally below 300 population) which cannot be given independent school for economic reasons and are, therefore, attached for schooling facility to bigger villages or to urban areas within a "walking distance" of one mile from them. The table No. 16.2 and 16.2 (A) give information regarding number of institutions and enrolment therein, by type of education. In table No. 16.2 (A) those categories of education are shown for which the institutions are reported in a very few districts and such categories are not shown in table No. 16·2. The classification of institutions according to 'type' is slightly different from 'stage' of education. There are at present many secondary schools which also impart education in 'primary' courses. Nevertheless, the entire enrolment of students is included under 'secondary' education. A realistic picture may perhaps be available from table No. 16·4 which gives the break-up of the total enrolment of students in pre-primary, primary and secondary schools according to standards. Children between ages 3 and 5 attend pre-primary institutions. These are generally known as kindergarden, montessory etc. Primary institutions provide education for standards. I—IV or standards I—VII/VIII or less and teaches the curriculum approved by the Education Department. Whereas secondary institutions coaches students for standard VIII to X or XI/XII with or without lower standards. Higher education is education after passing Secondary School Certificate Examination which leads to a degree examination. The table No. 16·3 gives districtwise figures of total number of teachers and trained teachers in different types of schools. The table No. 16·5 gives dirtibution of pupils according to medium of instructions. Information pertaining to six imporant languages is shown separately. The table No. 16·6 gives distribution of pupils in pre-primary, primary and secondary types of schools taken together by specified age groups. The table No. 16·7 gives particulars of examination results held during different years. The statistics are presented according to examinations. The table No. 16·8 gives imporatant statistics indicating the progress under compulsory education in different divisions of the State. It is to be noted that the figures in columns (12) to (15) in table No. 16·8 are not comparable with the corresponding figures in other tables as compulsion is made for various age-groups, viz., 6—11, 7—11, 7—9, etc., in various areas but ac

#### 20. Judicial and Administrative (XVII):

20.1. In this section, the relevant statistical data relating to the Police Department of the State, Judicial Courts and Prisons are included. As regards statistics regarding Police, the same are presented in two parts—one relating to activities of Greater Bombay Police and the other relating to rest of the Police organisation including railway police. Some of the figures published here are under scrutiny. The table No. 17·1 gives information regarding cost and strength of police in Greater Bombay. The temporary and permanent strength is shown separately. Similar information about the rest of the Police Organisation (including railway police) is shown in table No. 17·2 and 17·3. The strength shown in these tables of different categories is the number of posts created in various offices of the Police Department. Statistics regarding cognizable crimes handled by Police Department are presented in table No. 17·4, 17·5 (Greater Bombay) and 17·9 and 17·10 (rest of the State). Information regarding the disposal of cases handled by the police and statistics regarding the number of persons involved in these cases are shown separately. Similar statistics regarding non-cognizable crimes are shown in table No. 17·6, 17·7 (Greater Bombay) and 17·11 and 17·12 (rest of the State). The table No. 17·8 gives particulars of property stolen and recovered in Greater Bombay during each year. The table No. 17·18 gives particulars of police stations, out posts, total strength of police and total number of cognizable cases dealt with by the police in each district. Similar information for Greater Bombay is shown in table No. 17·16 to 17·24. Number of judicial officers in civil and criminal cases exercising appellate and original jurisdiction are shown in table No. 17·16 to 17·24. Number of judicial officers in civil and criminal cases exercising appellate and original jurisdiction are shown in table No. 17·19 and 17·20 respectively. Table No. 17·19 gives the same regarding the appeals and revisions in criminal cases in Maharashtra Sta and courts at the headquarters and of criminal cases in the tribunals of various classes are presented in table No. 17-19 and 17-20 respectively. Table No. 17-21 gives the same regarding the appeals and revisions in criminal cases in Maharashtra State. Table No. 17-22 gives the business of the civil Appellate Courts in Maharashtra State. Number of offences reported and punishments inflicted in criminal cases are given in table No. 17-23 and 17-24 respectively. Six tables No. 17-25 to 17-30 give statistics regarding prisons for the years 1960 to 1965. Table No. 17-25 shows the prisoners confined in jails and subsidiary jails in Maharashtra State. The admission and disposal of the convicts and their age, state of education are given in table No. 17-26 and 17-27 respectively. Nature and length of sentence of convicts admitted into the jails are presented in table No. 17-28. The convicts admitted into the jails who had been previously convicted are given in table No. 17-29. Youthful offenders under 16 years of age are also shown. Itemwise expenditure in guarding and maintaining the prisoners is also given in table No. 17-30.

#### 21. Press and Publications (XVIII):

21.1. This section gives information regarding number of printing presses working in the State and some important particulars about books and periodicals published in the State. Wherever possible, further classification of books and periodicals according to languages and according to subjects is also given here. In the table No. 18.2, the classification of newspapers (as defined by Section 1 of the Press and Registration of Books Act, 1867) according to language and periodicity is given. Information given in table No. 18.4 and 18.5 is provisional. Moreover, the periodicals shown in these tables do not include periodicals, the periodicity of which is of short duration; such as dailies and fortnightlies.

# 22. Medical (XIX):

22.1. The table No. 19.1 given in this section gives information regarding number of hospitals and dispensaries working and total number of beds in each district. The table covers all State and Central Government institutions, institutions owned by municipalities and local bodies and also private aided and unaided institutions. Under private institutions, charitable institutions or institutions maintained by private bodies are covered. Thus, private clinics run by individuals are not included. The institutions under control of the State's Directorate of Public Health and under Zilla Parishads (primary health centres) are not included in this table.

# 23. Housing (XX):

23.1. This section gives data on housing collected through 1961 Census. In the 1961 Census, a "house" was defined as 23.1. This section gives data on housing collected through 1961 Census. In the 1961 Census, a "house" was defined as "a structure or part of a structure (inhabited or vacant or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc.), with a separate entrance whether that separate entrance led directly to the street or to a common staircase, courtyard or a gate". The table No. 20.1 gives classification of houses according to the purpose for which they were used. The distribution of 1,000 Census households by the number of rooms occupied is given in table No. 20.2, which is based on 20 per cent Sample. A room has four walls with a doorway and a roof overhead and of at least 6' × 6' dimensions. Unenclosed verandah, kitchen store, garage, and cattle-shed or places of sizes smaller than 6' × 6' are not treated as rooms. Households residing in any one of such places are treated as having no regular rooms. A 'household' is a group of persons who commonly live together in the same house and take their meals from a common mess unless exigencies of work prevent any of them from doing so. Material presented here is restricted only to the family type of households. Institutional households, i.e., groups of persons residing in hostels, boardings, prisons, hospitals, etc., who otherwise satisfy the definition of household, are not included here. ings, prisons, hospitals, etc., who otherwise satisfy the definition of household, are not included here.

# 24. Prices (XXI):

24.1. Table No. 21.1 gives month-end wholesale prices of some important commodities ruling at important market places in the State. Prices at the end of June, September, December and March are shown. Prices as at the end of cach month are regularly published in the 'Maharashtra-Quarterly Bulletin of Economics and Statistics'. These data are initially collected by the office of the Marketing Research Officer, Bombay. Table No. 21.2 gives prices of gold and silver at the Bombay Market, as published by the Reserve Bank of India in their Bulletin.

#### 25. Index numbers (XXII):

25·1. The index numbers of wholesale prices in India issued by the Economic Adviser to the Government of India are presented in table No. 22·1. The base year for the series is 1952-53. The details of the method of construction of the index is given in the 'Appendix to index number of wholesale prices in India—revised series' (1956) issued by the Office of the Economic Adviser to the Government of India. The table No. 22·2 gives the new series of consumer price index numbers for working class for seven centres viz., Bombay, Poona, Sholapur, Jalgaon, Nanded, Aurangabad and Nagpur. The base years for the new series are 1960 for Bombay, Sholapur and Nagpur and 1961 for Poona, Jalgaon, Nanded and Aurangabad. The equivalent old index numbers can be obtained by multiplying the new index by the following multipliers:—

			Cen	tre		obtain th series fro	er to be used to e index of old m the general the new scries
			(	1)			(2)
(i)	Bombay				 	 	4.44
٠,,	Sholapur	• •			 	 	3.82
(iii)	Jalgaon				 	 	5.29
(iv)	Nagpur				 	 • •	5.22
(v)	Nanded				 	 	2-45
(vi)	Aurangabad				 	 	2.22

The details regarding the scope and method of compilation of the new index for Bombay and Sholapur are given in Labour Gazette, December 1965 issue, for Jalgaon and Nagpur in January 1966 issue, for Poona in August 1965 issue and for Nanded and Aurangabad in March 1966 issue of the Labour Gazette issued by the Commissioner of Labour, Government of Maharashtra.

25.2. Table No. 22.3 gives consumer price index numbers for agricultural labourers in Maharashtra. The series is compiled by the Labour Bureau. The year 1960-61 is the base. The details of the method of construction and scope of the index is given in Indian Labour Journal, Vol. V, No. 11. Table No. 22.4 gives consumer price index numbers for non-manual employees compiled by the Central Statistical Organisation. The year 1960 is adopted as base. In Maharashtra, the index is worked out for Greater Bombay, Poona and Nagpur. The method and scope of the index is explained in 'Monthly Abstract of Statistics', August 1966, published by the Central Statistical Organisation.

#### 26. State Income (XXIII):

26.1. The table No. 23.1 gives estimates of State Income at current prices. These estimates are based mostly on the conventional methods suggested by the National Income Committee for preparation of National Income estimates. The available statistical material for building up such State Income series had always been inadequate. However, new sources of information such as Annual Survey of Industries and National Sample Survey are now becoming available, and the data released under these surveys are being utilised towards building up State Income series. As a step towards standardisation, inter-state comparability and precision, the method of building these estimates is being shortly revised.

# 27. State Finance (XXIV):

27.1. Three tables are included in this section. The first two tables give figures of revenue receipts and revenue expenditure of the State under different heads for the years 1965-66 and 1966-67, respectively. Further details will be found in the Financial Accounts of the State Government. The third table gives figures of receipts and expenditure on both revenue and capital accounts in a summary form.

# 28. Annual Plan (XXV):

28.1. 'The table included in this section gives details of expenditure under each major head of development during Annual Plan.

#### 29. Trade (XXVI):

29.1. The first two tables included in this section give particulars of imports and exports of Bombay Port. The information is extracted from the annual report of Bombay Port Trust. The third table gives imports in and exports from this State to the other States of the country by rail. The source of this information is the 'Accounts relating to inland (rail and river borne) trade of India' published by Department of Commercial Intelligence and Statistics, Calcutta.

#### 30. Miscellaneous (XXVII):

30-1. Three tables are included in this section. The table No. 27-1 gives important financial statistics relating to Reserve Bank of India. The table No. 27-2 gives classification of the assesses assessed to income tax according to range of income assessed to tax their income and tax payable for the assessment year 1964-65. The assesses are sub-divided into (i) individuals (salary earners), (ii) individuals (non-salary earners), (iii) Hindu undivided families, (iv) unregistered firms, (v) registered firms, (vi) companies (public limited), (vii) companies (private limited) and (viii) others. The total income shown in the table represents the resultant income assessed to tax after deduction from gross income of (i) income from capital gains and (ii) loss set off against income under sections 71 and 72 of the Income Tax Act. The table No. 27-3 gives number of dealers registered under Sales Tax Act, and their total sales during 1962-63. For this purpose, the dealers are classified into different groups according to the commodities mainly transacted or traded by them. Under the column of sales, however, their entire sales are included.
